 Codepen  Leetcode  HackerRank  Military completed  Portfolio

PROFILE

Full-Stack Developer skilled in React.js, Spring Boot, and database integration. Skilled in converting system requirements into ERD diagrams, creating physical databases schema, and building back-end services to handle user requests. Skilled in developing user interfaces using React JS and Redux Toolkit, with a focus on creating dynamic and responsive front-end solutions.

EXPERIENCE

Software Engineer @ Vodafone Jun 2025 – Present

- CRM & Backend Engineer with deep expertise in Oracle Siebel CRM customization, enterprise integrations, and distributed system design. Extensive experience in developing scalable backend services using Spring Boot, JPA, and Hibernate, implementing RESTful APIs, and optimizing complex SQL queries for high-volume transactional systems. Led event-driven integration architectures using Kafka and implemented CI/CD automation through Jenkins to enhance deployment efficiency and system reliability. Adept at performance tuning, system troubleshooting, and ensuring high availability across mission-critical enterprise environments.

Backend Java Developer (Full-Time - on site) @ Sheen Sep 2024 – Jun 2025

- Developed and maintained scalable B2B and B2C travel booking services using Spring Boot, MySQL, Redis, and Microservices Architecture.
- Integrated with multiple external suppliers and third-party APIs to automate booking workflows and ensure seamless data synchronization across systems.
- Developed and maintained real-time PNR notification services to provide instant booking updates and travel status changes.
- Optimized database performance through Hibernate Native Queries, query tuning, and advanced MySQL indexing techniques, significantly reducing response times.
- Improved system performance by implementing Redis caching strategies for frequently accessed data and search operations.
- participated in CI/CD activities, deployment management, and release validation across staging environments.
- Working in an Agile Scrum environment, delivering features iteratively while optimizing system performance.

Java developer @ Egyptian Holding Company for Silos (ehcss). Feb 2023 – Nov 2023

- Designed and developed RESTful APIs for a silo management system, providing real-time insights into wheat capacity, inventory levels, and inbound/outbound transactions using Spring Boot and JPA.
- Implemented role-based user administration features, allowing managers to manage user access through activation and deactivation functionalities.
- Built a secure authentication and authorization framework using Spring Security, JWT, and Role-Based Access Control (RBAC).
- Developed a real-time messaging system to improve communication between silo personnel and traders, enabling efficient appointment booking and operational coordination.
- Participated in database design, business logic implementation, and system integration to support large-scale silo operations.

EDUCATION

Faculty of Electronic Engineering, B.Sc. in Computer Science

09/2018 – 07/2023

- Overall Grade: Very Good (82.34%)
- Graduation Project Grade: **Excellent**

VOLUNTEER

ICPC Training Coach:

Coaching a competitive programming team for the ICPC competition, focusing on strengthening problem-solving skills, data structures, algorithms, time complexity analysis, and contest strategies.

Content creator

Created educational programming tutorials on front-end, back-end, and software engineering.

IEEE Mentor:

Mentoring student teams in problem-solving and competitive programming.

SKILLS

Programming Language

- Java
- Javascript
- SQL
- Typescript

Database Technologies

- MySql
- Mongodb

Front-end

- Redux Toolkit
- React Js & Angular

Frameworks & Libraries

- Servlets
- Spring Boot, Spring MVC, Spring Data JPA , Spring Cloud, spring Security
- React Js

Version Control & Tools

- Gitlab, GitHub
- Maven (Build Automation)
- NPM
- Redis for second cache level

Software Development Practices

- Object-Oriented Programming (OOP)
- SOLID Principles, Design Patterns
- System Design
- Microservices Architecture

DevOps & Automation

- Docker
- jenkins
- uipath orchestrator

PROJECTS

NDC Portal

NDC is an online sales channel B2B for Wonder travel, our goal is to develop smart technology to make booking travel services easier, save and more profitable.

- Backend Development (Spring MVC, Hibernate, MySQL).
- Performance Optimization & System Enhancement.
- Feature Delivery & DevOps Support.

Management System for Silo Company

Software management system for egyptian holding company for silos storage in menouf. Collaborated with backend teams to integrate services supporting real-time crop tracking, inventory workflows, and distribution management, improving operational efficiency and data accuracy.

- Requirements Analysis & System Design ERD and UML diagrams.
- UI/UX & Frontend Development (Figma, React.js, Redux Toolkit, MUI).
- Full-Stack Collaboration & Warehouse Operations Automation (Spring Boot, JPA, Spring Security JWT).

E-Commerce Platform Using Spring Boot Microservices & Kafka

- Microservices Architecture (Spring Boot).
- Backend Development & Security (PostgreSQL, MySQL, Redis, Spring Security, JWT).
- Event-Driven Communication & Observability (Kafka, Zipkin).

HR Management System

- Developed an HR Management System using Spring Boot, JPA, SQL Server, DTOs, MapStruct, and Lombok, following clean architecture and RESTful API best practices.

Responsive Online Portfolio

- React.js

CERTIFICATES

- | | | |
|---|--|---|
| • Oracle Siebel CRM Certified Foundations Associate  | • Object-Oriented Design  | • Design Patterns  |
| • Udacity Front-End Web Developer Nanodegree  | • Huawei HCIP-AI EI-Developer V2 | • HCIA  |

LANGUAGES

Arabic

Native Language

English

Good command of both written and spoken English
